

NOAM EFERGAN

Senior iOS Engineer | Kotlin Multiplatform

Huddersfield, UK | noamifergan@gmail.com

nowham.dev | linkedin.com/in/noamefergan | github.com/NoamEfergan

PROFILE

Six years building consumer mobile products, primarily native iOS in Swift and SwiftUI. Production Kotlin Multiplatform experience at Yazio and gaming-sector mobile experience at Bally's Interactive. Delivers shared domain logic and native interfaces, owning features from implementation and testing through store release.

CORE SKILLS

Native mobile: Swift, SwiftUI, UIKit, Combine, Swift Concurrency, Kotlin, Jetpack Compose

Shared architecture: Kotlin Multiplatform (2 years), Kotlin (4 years), Swift packages, MVVM, dependency injection

Delivery: XCTest, snapshot testing, Fastlane, GitHub Actions, CircleCI, Gradle, TestFlight and App Store releases

PROFESSIONAL EXPERIENCE

Yazio | Senior Mobile Engineer | June 2025 to present

Deliver user-facing features in a production Kotlin Multiplatform codebase, connecting shared domain logic with native SwiftUI and Jetpack Compose interfaces. Work spans onboarding and retention flows, social features, push notifications and analytics. Improve mobile testing and developer tooling, and resolve production integration issues.

Kitman Labs | iOS Developer | May 2023 to June 2025

Delivered mobile messaging, login and user settings work across iOS and Android. Rebuilt mobile build and release automation using Fastlane and CircleCI, including TestFlight deployment and Swift package versioning. Introduced SwiftUI and XCTest into a modular codebase.

Bally's Interactive | iOS Developer | December 2021 to May 2023

Built core player experience screens in SwiftUI for a gaming business, taking features from design through release. Mentored junior developers in architecture, testing and code review.

PumaPay | Junior iOS Developer | March 2020 to December 2021

Built wallet networking functionality using Combine on iOS and RxJava on Android. Worked on blockchain integrations and introduced unit testing to the iOS codebase.

INDEPENDENT PRODUCT: DEE

Founder, designer and developer of Dee, a Muay Thai training app shipped on iOS and Android. Own product design, implementation, testing, store releases and ongoing maintenance. Includes training plans and guided workouts, with Apple Watch and Live Activities support on Apple platforms.

iOS: apps.apple.com/app/id6788483296

Android: play.google.com/store/apps/details?id=dev.nowham.dee

SPEAKING, COMMUNITY AND WRITING

Upcoming, October 2026: Speaker at SwiftCon and KotlinLeeds on KMP and Yazio's onboarding experience.

February 2026: Speaker at ARctic Conference on developer automation.

SwiftLeeds production team member. Write about iOS development, Swift tooling and mobile CI/CD at nowham.dev.
